EXPERTISE (ON A SCALE OF TEN)

Node.js: 4
Javascript: 6
Git: 7
Nginx: 3
SQL: 6
Linux/BASH: 6
CSS/HTML: 6
PHP: 6
Symfony: 4
Python: 2
accessibility: 2
OOP: 4

EMPLOYMENT

2020 January – Present

OfficeSupply.com, Madison, WI — Back-end developer.
Our team makes features for three sites: the customer facing
site, the call site, and the marketing reports site. Our PHP code
base is 130,000 lines. Our Agile team disperses many sprint
stories equally; I have an equal chance of getting the LAMP, Dev
Ops, AWS sprint stories. On larger stories I pair. I have
functionally reviewed 80% of the types of sprint stories. We write
our own tests, mostly unit tests, sometimes integration tests.

2017 December – 2019 October

Scooter Software, Madison, WI — Software QA and first level of
response for troubleshooting customer issues, writing up bugs.

2006-2017

**New York City Public Schools, Madison East High School ,
Verona Area High School**
Teacher of Computers, Physics, Chemistry

EDUCATION

After university I finished bootcamp courses from Udacity,
Coursera, EdX, Codecademy, Udemy, Pluralsight, Symfonycast

Post Baccalaureate: Computers, Hunter College in New York
City

Masters of Science: Chemistry, The Ohio State University

Bachelors of Science: Science, Oakland University
